Flatbed Fall Prevention – LOAD ANGEL® Work Safe

If you require a market leading **Fall Prevention Platform** which is capable of working on rough or unmade ground or in a workshop environment to aid the completion of maintenance tasks.

Our Load Angel Work Safe Range of Platforms could be the ideal solution.

Based on the design features of our existing Load Angel products we can design and manufacture platforms to suit your particular piece of plant equipment or vehicle to aid access during repairs or maintenance procedures. The Load Angel Work Safe Platform (pictured above on the left) has been used on such plant as an Atlas 1404 Gigarailer, Terex Gigarailer, Case 988, Case WX170, Mecalac MXB, Bell Dump Truck, Komatsu PC138, Kobelco SK135, Kobelco SR200 Monster Bug and Liebherr A900.

We have already designed and built numerous bespoke Load Angel Work Safe platforms to provide safe access to various pieces of plant and equipment which can be viewed in the gallery and in the PDF technical section.

Developed in conjunction with HSE, our platforms are manufactured within the guidelines of BS5395-1:2010 Stairs/Ladders/Walkways and the open steel flooring used for the floor to BS 4592 part 1 (2006) and is rated to general duty regular two way pedestrian traffic 5.0KN/m2.

Load Angel Work Safe Platforms can be mounted on a range of castors to suit most ground conditions and environments.

If you do not see what you require in the gallery please do not be afraid to ask, as this is what we do best.
